

“CADfix is at the heart of everything we do. In effect, we use it as the hub of our operation.”

Paul Baker

BAE Systems

3D Healing & Translation

CADfix is a translation, healing and repair tool for 3D CAD data.

Using CADfix, product manufacturers can minimize model rework, enable multiple design iterations, improve the analysis process and tailor CAD data for use in downstream applications.

FEATURES

- Import and export functionality for a variety of CAD formats, solid modeling kernels and data exchange standards
- Advanced healing and repair engine to correct and repair geometric and topological flaws within the CAD model
- Batch and wizard driven modes for automatic and interactive functionality
- Prepares CAD models for analysis by reducing complexity through de-featuring and simplification

INTERFACE SUPPORT

NATIVE	NEUTRAL	PLATFORMS
• CATIA v4	• ACIS	• Sun Solaris
• CATIA v5	• IGES	• HP UNIX
• Pro/E	• STEP	• IBM AIX
• CADD5	• Parasolid	• Windows
• ANSYS	• VDAFS	• Linux
• Unigraphics	• DXF/DWG	• SGI
• Solidworks		
• Inventor
