

## FloWizard 3.0 Windows Hardware Requirements

### Memory Size

A minimum of 512 MB RAM is required, however, 1-2 GB RAM is recommended. The actual memory required for a particular problem will depend on the size of the mesh, the physical models that are enabled, and the complexity of the domain. Please contact installation support, [installsup@fluent.com](mailto:installsup@fluent.com), for more information.

### Disk Space Requirements

Installation	Space Requirements
software + documentation	400 MB

Storage for user files (case, data, and post-processing files) will vary by problem and require additional space.

### Operating system

Check the [Supported Platforms page](#) for current platform availability.

TCP/IP network protocols.

3-button mouse recommended.

### Media Requirements

The software can be supplied:

via the Internet

on CD-ROM

### Graphics Support

Fluent Inc. products support Professional Open GL graphics cards. Please contact [installsup@fluent.com](mailto:installsup@fluent.com) for graphics card recommendations.

### License Server Software

Fluent Inc. products use FLEXlm for license management. If you choose to employ the FLEXlm floating manager on a Windows network, your network server must be running Microsoft Windows 2003, Windows 2003 Server, or Windows XP Pro.
